

Passport® Food Safety Solutions Launches to Trade Media

Recently, we took another big step in sharing our story with the industry. Our press release quickly defines our innovative systems approach to food safety. We outlined our product offerings, our state of the art analytics and analysis tool [PassTrac®](#), and our unique innovation model that will bring new technologies to market faster than ever before. Have a look at how we are doing things that have never been done before.

Now's the Time for Finalyse®

Temperatures are climbing as will the incidence in *E. coli* O157:H7. Since its introduction in 2009, [Finalyse](#) has become a trusted intervention to help manage *E. coli*. When applied to live cattle at the plant, it decreases pathogen load by ≥ 1 log. Finalyse is made from naturally occurring phages that safely destroy harmful *E. coli*. Our team can assist with your Finalyse startup — including equipment evaluations and activation, titer testing and customer service.

Finalyse®

BoviBrom® – Simple, Reliable and Predictable *E. coli* and *Salmonella* Treatment

[BoviBrom](#) (DBDMH) is a broad spectrum post-harvest antimicrobial that reduces levels of *Salmonella* and *E. coli*. BoviBrom dissolves in water to form hypobromous acid (HOBr), an antimicrobial applied to multiple meat protein species and interventions. BoviBrom has been proven effective as a hide, pre-

evisceration, carcass and head wash and as a spray chill intervention.
